Società Italiana
di Endodontia

SIE – the Italian Endodontics Society – is the most important Italian Scientific Society in the field of Endodontics, with over 1,000 Members. The Society organises training courses all around Italy.

SIE Members are among the most renowned experts in Endodontics in Italy, working both as freelance and in universities. Our society allows Freelancers and University Teachers to get together in order to exchange of theoretical knowledge and practical experiences.

The association promotes Endodontics all around Italy through courses and congresses. The Regional Sections guarantee a strong cultural activity at local level, thus help increase the interest and appreciation towards Endodontics, especially among young people.

Our official Journal – Giornale Italiano di Endodontia – is one of the most globally appreciated journals of the sector, both for its articles and graphics. The Journal is sent free to all Members every six months.

LETTER OF THE PRESIDENT

FRANCESCO RICCIELLO - SIE PRESIDENT

Dear Colleagues,

Our International Congress is coming.

The Internationalisation has always been one of the goal of the SIE and on which the Board has focused the attention in the recent years, so the number of our associates known abroad is increased.

- The Pre-Congress Course will be given by the Dr. Arnaldo Castellucci and Dr. Augusto Malentacca and titled "**Problem solving within the scope and challenges of endodontic procedures**";

- An innovative programme and always highest level, in which we will have Italian and Foreign Speakers in the Auditorium Room: **Pio Bertani, Giuseppe Cantatore, Filippo Cardinali, Antonios Chaniotis, Vittorio Franco, Massimo Giovarruscio, Salvatore Sauro, Francesco Mannocci, Walid Nehme, Mohammad Hossein Nekoofar, Francesco Ricci- tiello, Katia Greco, Patrick Sequeira-Byron, Stephane Simon;**

- We will have a room that will be used as **support**, within which will project all the conferences from the Main Room, so in this way all the numerous participants enrolled can enjoy **in total comfort the Congress**;

- The **SIE Award Session** titled **Garberoglio, Ritanò and Lavagnoli** had obtained a huge success abroad and we have never had so many submissions as this year.

- The **Session Poster** will see, as usual, the poster posting for all the Congress, but the innovation of this year is that participants chosen by the Selection Board can exhibit their work in the parallel room.

- We will have **5 Master Clinician Session Live** with live clinical demonstration held by the highest repute National and International Speakers.

- This year we will introduce a new way of participation for all the Congress members, that it is called **Clinical Theatre**: we will realize three theatre, and we have chosen three topics undoubtedly interest that will be examined by esteemed SIE Active Member;

- We will organize the **Sponsored Clinical Table** that year by year become an important moment for the Sponsor, that have the possibility to show the last product on the market, so in

this way the Congress members can try directly.

- I can reveal in advance the strong interest that the Congress has obtained by the **Sponsor**, that is so high that we have already established the major part of the emplacements.

- The Congress will be **CME accredited**, like all our events and we will have, to make it easier both Italian and foreigners, the simultaneous translation...

...all of this to narrate once more the passion that all of the SIE members put to increase the development scientific in endodontics field every year and encourage you to take part to an events which has to do not need of presentations, because it is unmissable!

Conclude my role with the International Congress of Milan and pass the baton to the **Elected President - Vittorio Franco**, is the viaticum for a luminous future of the SIE.

We have made a lot even if with some difficulty: thanks to the experience of the **Past Presidency - Pio Bertani** and to the enthusiasm of the **Deputy President - Maria Teresa Sberna**,

to whom I have recognized a big abilities in the organization of the Congress at the San Raffaele.

The work that this Board has realized has been a rigorous check of the expense and this thanks to an alert work of the Secretariat and the **Treasury - Filippo Cardinali**, that I thank for his work.

The resolution of fiscal problem but above all the increase of the number of Sponsor, this year we have 5 Main Sponsors for this Congress, is a reason of a big satisfaction. I lived in symbiosis in this two years with the **Secretary - Roberto Fornara**, to whom I ask publicly excuse, for my phone call at absurd time of the morning, but with which we worked in the interest of the Society and the Associates. I would like to thank you the **Communications Coordination - Italo di Giuseppe** and the **Cultural Coordinator - Mauro Rigolone** for their work, and also **Katia Greco** and **Alberto Rieppi** our **Auditors**, always present to our Councils, even if they have no right to vote.

A big kiss is for Gaia precious colleague, she represents the real soul of the Society and we can't do a better choice.

Now I would like to thank you all of you, that you gave me the honor to be Your President, for this two-year period, a role that I carried out with the best efforts for the love and the interest that all of us have for our amazing subject: ENDODONTICS.

Francesco Ricciello

A handwritten signature in black ink, appearing to read "Francesco Ricciello".

LETTERA DEL PRESIDENTE

FRANCESCO RICCITIELLO - SIE PRESIDENT

Carissimi,

Si avvicina il nostro Congresso Internazionale di Milano.

L'internazionalizzazione è da sempre uno degli obiettivi della SIE e che il Consiglio Direttivo ha fortemente spinto negli ultimi anni, infatti sempre più numerosi sono i nostri Soci conosciuti ed apprezzati all'estero.

- Il Corso Pre-Congresso sarà tenuto da **Arnaldo Castellucci ed Augusto Malentacca** e intitolato "**Problem solving within the scope and challenges of endodontic procedures**";

- Un programma innovativo e di sempre altissimo livello, vedrà susseguirsi **Relatori Italiani e Stranieri** nella Sala Auditorium: **Pio Bertani, Giuseppe Cantatore, Filippo Cardinali, Antonios Chaniotis, Vittorio Franco, Massimo Giovarruccio, Salvatore Sauro, Francesco Mannocci, Walid Nehme, Mohammad Hossein Nekoofar, Francesco Riccitiello, Katia Greco, Patrick Sequeira-Byron, Stephane Simon;**

- Avremo una Sala apposita che fungerà da **rimando** all'interno della quale verranno proiettate tutte le conferenze della Sala principale, per far sì che tutti i numerosissimi partecipanti iscritti possano godersi nel **totale comfort il Congresso**;

- La **Sessione Premi SIE** intitolati a **Garberoglio, Riitano e Lavagnoli** hanno riscosso un successo incredibile all'estero e non abbiamo mai avuto così tante submission come quest'anno.

- La **Sessione Poster** vedrà come di consueto l'affissione del manifesto per tutta la durata del Congresso, ma l'innovazione di quest'anno è che i selezionati dalla commissione esaminatrice potranno esporre il loro lavoro nella sala parallela, davanti ad una platea di persone interessate oltre che ai valutatori.

- Avremo 5 **Master Clinician Session Live** con dimostrazioni cliniche in diretta tenute da Relatori di chiara fama Nazionale e Internazionale;

- Quest'anno introdurremo una nuova modalità di partecipazione per tutti i congressisti a cui abbiamo dato il nome di **Teatro Clinico**: realizzeremo tre teatri, ed abbiamo scelto tre argomenti di sicuro interesse che saranno completamente sviscerati da bravissimi Soci Attivi SIE;

- verranno organizzate le **Tavole Cliniche Sponsorizzate** che anno dopo anno diventano un momento importante per gli sponsor, che hanno così la possibilità di mostrare le ultime uscite sul mercato e farle provare direttamente ai congressisti;

- Posso anticiparVi che già fin dai primi mesi dell'anno l'interesse per il Congresso da parte delle **Aziende Sponsor** era così elevato che abbiamo già definito la maggior parte delle postazioni;

- Il Congresso sarà **accreditato ECM**, come tutti i nostri eventi e avremo, per agevolare sia italiani che stranieri, la traduzione simultanea...

...tutto questo per raccontare una volta di più la passione che tutti noi della SIE ci mettiamo per accrescere ogni anno l'aggiornamento scientifico in campo endodontico e invogliarVi ancor di più a partecipare ad un evento che già di Suo non ha bisogno di presentazioni, perchè di sicuro imperdibile!

Concludere il mio mandato con il Congresso Internazionale di Milano e passare il testimone al **Presidente eletto - Vittorio Franco**, è il miglior viatico per un futuro radioso della SIE.

Abbiamo fatto tanto anche se con non poche difficoltà: un grazie all'esperienza del **Past President - Pio Bertani** e dell'entusiasmo del mio **Vice Presidente - Maria Teresa Sberna**, alla quale devo grande riconoscenza per la sua capacità nella realizzazione del Congresso al San Raffaele.

Il lavoro che questo consiglio ha concretizzato è stato un rigoroso controllo delle spese e questo grazie ad un attento lavoro della **Segreteria e del Tesoriere - Filippo Cardinali**, che ringrazio per il lavoro svolto.

La risoluzione di piccoli problemi fiscali ma soprattutto l'aver aumentato il numero degli sponsor, portando a 5 i Main Sponsor per questo Congresso, è motivo di grande soddisfazione. Ho vissuto quasi in simbiosi questi due anni con il **Segretario - Roberto Fornara**, al quale chiedo pubblicamente scusa, per le mie telefonate ad ore improbabili della mattina, ma con il quale abbiamo lavorato sempre nell'interesse della Società e dei Soci. Un ringraziamento al **Coordinatore della Comunicazione - Italo Di Giuseppe** ed al **Coordinatore culturale - Mauro Rigolone** per il loro lavoro, ma permettetemi di ringraziare **Katia Greco e Alberto Rieppi i nostri Revisori dei Conti**, sempre presenti ai nostri consigli anche senza diritto di voto.

Un grandissimo bacio va a **Gaia** preziosissima collaboratrice, lei rappresenta la vera anima della Società e non potevamo fare migliore scelta.

Devo ora ringraziare tutti Voi che avete voluto darmi l'onore di essere il vostro Presidente per questo biennio, incarico che ho portato avanti mettendo il mio massimo impegno per l'amore e per l'interesse che tutti noi nutriamo per la nostra splendida disciplina: L'ENDODONZIA.

Modern endodontic treatment: Reciproc® Blue e Guttafusion

Endodonzia moderna: Reciproc® Blue e Guttafusion

Today it is possible to achieve success in endodontics with a fast, simple and repeatable protocol, which is well suited to different canal anatomies and performs well both in treatments and re-treatments. Reciproc® Blue files are highly performing and safe tools; they are the perfect union between a shape specifically designed to work with the reciprocating movement and the physical characteristics of elasticity and resistance of the innovative NiTi alloy with Blue heat treatment. During the meeting, it will also be described how to obtain a perfect three-dimensional obturation of the canal system with the thermoplastic gutta-percha of Guttafusion system.

Enrico Cassai

New opportunities in endodontic treatments: R-Pilot™ and EDDY®

Nuove opportunità in Endodonzia: R-Pilot™ ed EDDY®

Which are main challenges that dentists meet in endodontic field today? To reduce the risk of instruments fracture inside canals with complicated anatomies and an effective cleaning of the full canal system. R-Pilot™ is the new file for reciprocating movement that creates a glide path and reduces the risk of instrument fracture caused by taper-lock or torsional stress; R-Pilot™ can be integrated in every canal shaping system, preceding and speeding up this procedure. EDDY® is the new polyamide sonic powered tip for the activation of irrigant solutions that enhance their effectiveness in terms of penetration, organic tissues dissolution and debris removal. During the workshop, lecturer will present the protocol for the glide path creation with R-Pilot™ and the suggested sequence for the activation of irrigant solution with the sonic tip EDDY®.

New concepts for a safe, efficient and predictable Endodontics

Nuovi concetti per un'Endodonzia sicura, efficace e predicibile

The continuous development of modern Endodontics impose the clinicians higher levels of quality.

Success depends on a number of factors, including appropriate instrumentation, successful irrigation and decontamination of the root canal space.

The new techniques and technologies allow the practitioner to tackle the endo practice without any anxiety achieving very good results in terms of safety and predictability.

Thanks to the new instruments, the operative techniques have evolved rapidly, ensuring a higher level of safety and reducing the working time.

The aim of the workshop is to present a protocol of canal shaping that is safe, fast and reliable.

The new Micro-Mega systems, zShape and One Curve, meet all these requirements: they are easy to use and allow a safe canal preparation since they can easily adapt to all anatomies.

During the workshop the participants will have the opportunity to test the instruments and to evaluate their effectiveness in combination with EndoUltra, the first cordless ultrasonic device for activation of irrigant solutions.

R2C protocol: The Root to Crown Solution

Il protocollo R2C - The Root to Crown Solution

The new protocol called R2C "The Crown Root Solution" explains to the clinicians how to maximize their treatment and how to reach the state of art in Endodontics and Restorative with Dentsply Sirona Solution.

During the workshop it will be explained in which clinical cases is better use the instruments ProTaper NEXT or WaveOne Gold supported by 3D Endo Software, the first CBCT based software designed to improve endodontic treatment planning for more predictability.

The new Gutta-percha master cones with Conform Fit technology are the first to feature a variable taper to precisely match your corresponding file. A perfect endo need a perfect resto: direct and indirect tooth Restoration. It will be described how and why you need to insert a fiber post. In situations where not enough hard tissue remains, a post is placed in order to provide sufficient retention for the core build-up and coronal restoration.

Next Level Endodontics: The Evolution of Bubbles

Endodontia del futuro: Evoluzione dell'attivazione laser degli irriganti

Disinfection and elimination of the microbial flora from the root canal system is one of the main goals of endodontic treatment. In recent years a novel application of laser activated irrigation named PIPSTM (Photon-induced photoacoustic streaming) was introduced. This method uses Er:YAG laser with a wavelength of 2940 nm which is delivered to the irrigant in the access cavity with a conical and stripped fiber tip. Since Er:YAG laser light is highly absorptive in water it causes boiling and micro-explosions in the irrigant solution, which induces cavitation bubbles. Further research in this field led to the development of SWEEPS® (Shock Wave Enhanced Emission Photoacoustic Streaming), which is a revolutionary method for cleaning and disinfecting the root canal system, utilizing the power of the Er:YAG laser to create powerful deeply penetrating shockwaves within the cleaning and debriding solutions. In that way irrigants penetrate deep into lateral canals and microscopic dentinal tubules to deeply disinfect dentinal walls by removing tissue, debris, biofilm and bacteria. An important advantage of the SWEEPS® laser endodontic treatment is that it cleans and disinfects root canal systems more effectively compared to conventional treatments. ... SWEEPS® promises to represent an entirely new way of thinking about root-canal therapy. With SWEEPS®, practitioners are able to offer patients faster, safer and more effective root-canal treatments.

Antonio Malagnino

Use of Mtwo instruments at different rpm according to the clinical needs

L'uso degli Mtwo a diverse rpm a seconda dell'esigenza clinica

With the coming of NiTi alloy, modern endodontics has evolved, improving the practice of the dentist and reducing working times. Nevertheless, the endodontist has kept some old habits belonging to the steel period. Other dogmas have added to the dogmas of the past, deriving from the perception that endodontics is not completely a surgical branch of dentistry. The aim of the meeting is to detect the objectives of the single steps of an endodontic treatment and, according to the logic of propedeuticity, provide different solutions, so as to gain the goal of an endodontic treatment: the tridimensional filling of the radicular canal with an apical seal.

Uses of Bioceramics in Endodontics: Technical Aspects

Usi delle Bioceramiche in Endodonzia: Aspetti tecnici

The introduction of MTATM by Torabinejad, in 1995, marked a turning point for the prognosis of therapies that often led to results which were not always predictable and satisfying.

Management of perforation, open apexes, hooding and closure of retrograde cavities was carried out by using different materials which, most of the time, were not fit for the purpose. At this point, the solution to these problems relied on each individual clinician's experience, knowledge and skills, which made therapy outcomes not always reproducible. In 2009, BiodentineTM, born as a proper dentinal substitute, was launched on the market by Septodont. Its physicochemical properties give it a higher performance, compared to MTA and, above all, make it easier to use.

Easy mixing and manipulation make it usable in all the above mentioned fields, therefore it is definitely first choice material for daily clinical practice.

The more than encouraging results from using "repair" bioceramics reported in literature (Root Repair Material), have led companies to produce an endodontic sealer which could contain the chemical properties of BiodentineTM, and overcome the limitations of traditional endodontic cements. The outcome of this research has brought about the birth of BiorootTM a proper endodontic sealer which enables exploiting the excellent properties of bioceramics.

This formulation offers the ability to seal the root canal in an extremely easy way, overcoming the limitations of the techniques used so far.

Lectures will examine the clinical applications of these materials and will provide participants with the best instructions for use on the basis of their own experience.

Step down technique and shaping completely mechanic and controlled

Step down technique e strumentazione completamente meccanica e controllata

In recent years, endodontics has had a great development from the point of view of techniques and instruments. All the procedures as glide path, preflearing and shaping have a great evolution: from steel to NI-TI, from manual technique to mechanical technique.

Now we can start to talking about completely mechanical and controlled Endodontics. Can we have a real total mechanic shaping of root canals? Can the length of the root canal be always under control? Which protocol is the best choice for this type of technique? Morita has the definitive solution.

Theoretical-Practical Workshop | Max 10 attendees each session | 30 minutes

Timetable

FRIDAY 9th NOVEMBER

13.30 - 14.30

SATURDAY 10th NOVEMBER

11.00 - 11.30

Information and advance enrolment

The endodontic retreatment with Endo ReStart KOMET

Il ritrattamento endodontico con Endo ReStart KOMET

Endodontic failures can be attributable to inadequacies in shaping, cleaning and obturation, iatrogenic events, or reinfection of the root canal system when the coronal seal is lost after completion of root canal treatment.

The goals of nonsurgical retreatment are to remove materials from the root canal space.

Nonsurgical endodontic retreatment procedures have enormous potential for success if the guidelines for case selection are respected and the most relevant technologies, best materials and precise techniques are utilized.

Endo Re-Start by Komet is a new instruments made for removal seal and guttaperca inside the endodontic canals. In this course the unique characteristics of these tools will be described. There is also a practical part on extracted teeth.

HOW TO GET THERE

■ MILANO MALPENSA (MXP)

www.sea-aeroportimilano.it

Milano Malpensa is located 48 km (30 miles) northwest of Milano and is the main hub for Northern Italy, handling transcontinental and international flights. How to reach the San Raffaele Congress Centre by public transport: – a shuttle bus service links Malpensa Airport to the Cascina Gobba Subway Station. The trip takes about 1 hour, depending on the traffic. For more information please visit www.malpensashuttle.com – Section Time Table – Itinerary Malpensa T1-T2/Linate. At the Cascina Gobba Subway Station you will find bus nr. 925, or the People Mover Shuttle, which takes you directly to the San Raffaele Congress Centre.

■ MILANO LINATE (LIN)

www.sea-aeroportimilano.it

Milano Linate is located 7 km (4 miles) east of the City Centre and is easily connected with the city. How to reach the San Raffaele Congress Centre by public transport: – a shuttle bus service links Linate Airport to the Cascina Gobba Subway Station. The trip takes about 10 minutes, depending on the traffic. For more information, please visit www.malpensashuttle.com – Section Time Table – Itinerary Linate/Malpensa T1-T2. At the Cascina Gobba Subway Station you will find bus nr. 925, or the People Mover Shuttle, which takes you directly to the San Raffaele Congress Centre.

■ ORIO AL SERIO INTERNATIONAL AIRPORT (BG)

www.sacbo.it

Orio al Serio is located 45 km (28 miles) northeast of Milano and handles domestic and international flights, most of them operated by low-cost carriers. How to reach the San Raffaele Congress Centre by public transport: – a shuttle bus service links Orio al Serio Airport to Milano's Railway Central Station. The trip takes about 1 hour, depending on the traffic. For more information please visit the following web site: www.terravision.eu The green line subway links the Railway's Central Station to the Cascina Gobba Subway Station, where you will find bus nr. 925, or the People Mover Shuttle, which takes you directly to the San Raffaele Congress Centre.

■ TRAINS

www.trenitalia.com | www.italotreno.it/en

Milano's main train station is the Stazione Centrale (Central Station) which has high-speed train links to other major Italian and European cities. Other important Railway Stations are: Cadorna, Lambrate, Porta Garibaldi. How to reach the San Raffaele Congress Centre by public transport: – the green line subway links all the above mentioned Railway Stations to the Cascina Gobba Subway Station. At Cascina Gobba you will find bus nr. 925, or the People Mover Shuttle, which takes you directly to the San Raffaele Congress Centre.

■ ATM MILANO

www.atm-mi.it/it/viaggiaconnoi/pagine/schemarete.aspx

The nearest Subway Station is Cascina Gobba – Green line – where you will find bus nr. 925, or the People Mover Shuttle, which takes you directly to the San Raffaele Congress Centre.
