Applicants will be given incremental credit for salary for their hospital employment in other countries (as an example of this if you have finished your medical specialization in an EU country of 5 years you would have an entry level of band 4 for a registrar level which implies 6000€ more a year in comparison to a first level entry). As an example of the salary paid, the estimated gross salary for a **Registrar** working a 1 in 5 on call rota is **€ 91,000 per year**, and for an **SHO** working a 1 in 5 on call rota is **€ 75,000 per year**. This is for an average work week of 57 hours and includes your on call hours. This is an example your salary is based on your pay scale and the number of hours worked, if you are offered employment by one of our hospitals they will be able to supply you with a more precise salary estimate. Please note this is a gross salary which is subject to tax and pension payment deductions.
